VII Semester – Capstone Project Review (2026–27)

External Industry Expert Feedback Report

A. General Information

Particulars	Details	
Department / Programme	ASAC/ B.Tech CSE AIML	
Project Title	**An AI-Powered Crop Disease Detection and Agrochemical Recommendation Framework**	
Student Details	Student Name	Registration Number
	Chalini M	2023BCSE07AED440
	Spandana Basava Kulal	2023BCSE07AED441
Faculty Guide / Mentor	Dr. Qawsar Gulzar	
Date of Review	15/10/2026	
External Industry Expert(s) – Name, Designation & Organization	1. Ms. Udhaya P 2. Dr. Jayabhaduri R	

B. Feedback from External Industry Expert(s)

1. Overall Assessment of the Project

Briefly summarize the industry expert's evaluation of the project.

The industry expert recommended clarifying the AI-based approach for identifying incorrect prescriptions, including the proposed deep learning model's architecture in the presentation, and exploring additional frameworks to strengthen the project implementation.

2. Key Observations and Feedback

Record the specific comments provided by the external expert(s).

1. How to split data for training, testing, and validation.
2. Chosen machine/deep learning model is not clear — CNN/EfficientNet.

3. Suggestions for Improvement

List the major recommendations given by the industry expert(s).

1. How to identify wrong prescriptions by AI?
2. Architecture diagram for the proposed deep learning model is not in the PPT.
3. Need to explore more frameworks.

C. Action Taken / Proposed Action Plan

#	Recommendations from Industry Expert(s)	Action Proposed by Students / Faculty	Target Date
1	How to identify wrong prescriptions using AI?	Explore AI-based prescription validation techniques to identify potentially incorrect prescriptions using appropriate medical rules and reliable reference data.	26/10/2026
2	The architecture diagram for the proposed deep learning model is missing from the PPT.	Prepare the architecture diagram of the proposed deep learning model and include it in the presentation.	30/10/2026
3	Need to explore more frameworks.	Explore and compare relevant deep learning Frameworks and select a suitable framework based on the project requirements.	5/11/2026

Faculty Guide Name & Signature: Dr. Qawsar Gulzar
